Rear Panel Connection
|				
1	Reset	7	Ground
2	Audio input	8	Alarm output
3	Audio output	9	Alarm input
4	Video output	10	Connect to PTZ
5	Power indicator	11	Ethernet interface
6	SD card slot	12	Power interface

4 Installation

* Before you start, please make sure that the wall is strong enough to withstand three times the weight of the camera.

① Rotate the lens clockwise onto the lens mount of the camera.

② Plug the wire of auto iris lens to the auto iris interface of the camera.
③ Connect the power supply and video output.

④ Attach the mounting block to the bracket which shall be supplied by yourself and then install the bracket to the wall and tighten the screws to fix it as shown below.
Mounting Block

⑤ Attach the camera to the bracket with the mounting block and tighten the screws to fix.

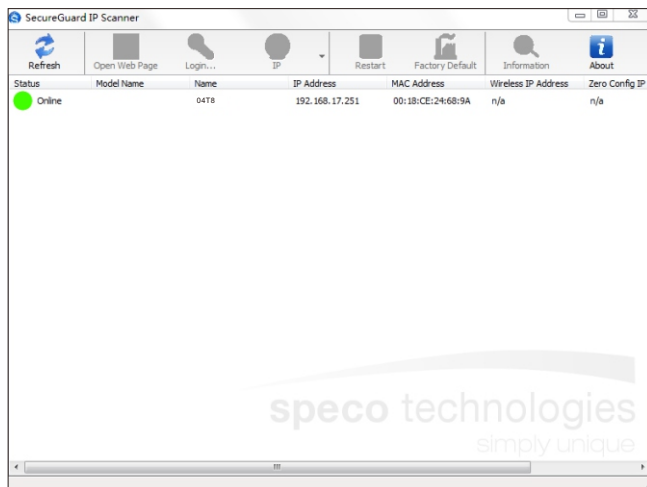

5 Web Operation and Login

IP Scanner can search for the device on the local network.

● **Operation**

① Make sure that the camera and the PC are connected to the same local network. The camera is set to DHCP by default.

② Install IP Scanner from the CD and run it after installation.

③ In the device list, you can view the IP address, model number, and MAC address of each device. Select the applicable device and double click to open up the web viewer. You can also manually enter the IP address in the address bar of the web browser.

The login interface is shown above. Default user name is admin and password is 1234. After logging in, follow directions to install applicable plugins.
