

SPECO SOLAR SECURITY

SX3 Kit Includes

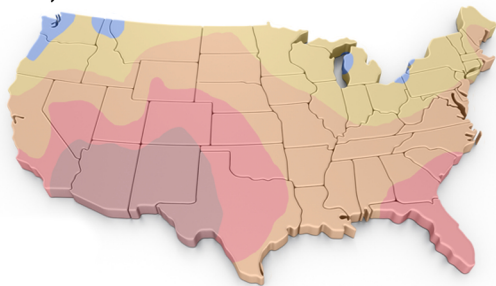

- Solar Panel
- NEMA 4X weatherproof enclosure
- Solar Controller and Camera/Networking Power Adaptors
- Pole Mounting Accessories

You will need the following to complete your installation:

- A sealed lead acid **battery** (we recommend at least 50AH and the enclosure can fit up to a 100AH battery) to store the solar energy.
- Your preferred method of **networking**, whether it be:
 - a) a 3G/4G router from your desired cellular provider, or one that specifically offers service where the unit will be installed.
 - b) Some sort of short-range (wifi) or long-range (point-to-point) networking.

Locate your zone

Peak Sun Hours
(kWh/m²/day)

5.5 Zone 1

4.5 Zone 2

3.5 Zone 3

2.5 Zone 4

1.5 Zone 5

We offer 6 different kits based on your location in the U.S. that will offer the maximum efficiency based on the historical amount of peak sunlight available.

The duration and effectiveness of a solar panel/battery combination can be greatly affected by regional and seasonal conditions such as lack of regular sunlight due to clouds/rain, short sunlight hours in the winter, and/or heavy or consistent snowfall. There may be areas of the country where we recommend against using a solar powered setup, or at least during the winter months.

Each kit is custom built, please allow up to 15 business days to ship.

Any stock returns will incur a 20% restocking fee.
