Speco Technologies

Intensifier® Technology
Captures color in low light. Great for diverse lighting environments.

People Detection
Analytic cameras that can capture imaging of people that enter your property and save them. Be alerted when a person enters the scene.

Line Crossing
Be alerted when a digital line is crossed in your application.

2 Factor Authentication
Combining Speco's Access Control solution with video surveillance provides a second layer of protection for entryways.

True Wide Dynamic Range (WDR)
Provides clear imaging when the foreground and background of a scene varies greatly in brightness (i.e. vestibules)

Two-way Audio
Communicate in real time with people in your cameras view over a microphone.
