Surveillance Application Diagram

Value Line Cameras

Virtually "draw" a line and be alerted when that line is crossed.

Face Detection

Analytic cameras that can detect faces and save them. Conveniently build and search a database of faces.

True WDR

Provides clear imaging when the foreground and background of a scene varies greatly in brightness (i.e. vestibules)

Intensifier® Technology

Captures color in low light. Great for diverse lighting environments.

Speco Access

Manage who can access specific rooms on your property.

License Plate Recognition

Analytic cameras that can detect, recognize, and alert on license plates that enter/exit your property. Build a searchable database of plates to keep your business secure.

Digital Deterrent®

Alert on events and stop crime before it occurs with bright flashing lights and audible warnings.

IP Audio

Speco's IP Audio allows easy installation with a single network cable (PoE). These speakers offer a scalable system to build on with a sleek look and premium sound quality.
