

PREVENT SYSTEM DOWNTIME WITH **SecureGuard® Dashboard**

An all-in-one central management dashboard giving you the unique ability to remotely manage your customer's video surveillance system. Swiftly diagnose your customer's recorder and camera health status before the customer notices an issue.

FEATURES & SPECIFICATIONS

Stay Connected

Monitor and manage your system in real-time, anytime.

Custom Floor Plans

Upload your building's floorplan so you always know exactly which camera needs attention.

System Health Check

View the status of all your connected systems from one dashboard

Advanced Face Search

Search for a face on one recorder and sync it across all connected systems for faster, more accurate results.

Configuration

Remote Management*

Update settings, configure hardware, and adjust analytics without needing an on-site visit.*
[Feature is available upon request.](#)

Secure Access Control

Add or manage user accounts and easily update passwords for one or multiple sites.

Recorder Details at a Glance

Easily see your recorder's model, firmware version, and user information plus connect directly to its live view.

Complete Site Overview

View all your locations from one dashboard — no matter how many sites you manage.

Instant Alerts

Get notified right away if a camera loses video, is tampered with, or if your site goes offline.

Logs & Reports

Review and export dashboard activity logs whenever you need them.

AI Control Made Simple

Turn Artificial Intelligence features on or off for any recorder channel with a single click.

Mobile & Web Access

Stay in control from anywhere using your phone, tablet, or computer.
