DIGITAL DETERRENT®

Call us to learn more: 1.800.645.5516 or email at orders@specotech.com

What is Digital Deterrent®?

Proactive. Intelligent. Effective.

Traditional security systems record incidents after they happen. Speco Digital Deterrent® solutions are designed to help prevent incidents before they occur.

By combining advanced analytics, active warning lights, customizable audio messages, and real-time monitoring capabilities, Digital Deterrent cameras help stop unwanted activity, reduce false alarms, and provide operators with the information they need to respond faster.

Detect

Integrated sensors and dual cameras detect suspicious activity in real-time.

Deter

Loud audio warnings and flashing lights discourage intruders and draw attention.

Verify

High-resolution video provides clear evidence and helps assess situations.

Respond

Live audio and real-time alerts enable faster response when it matters most.

Our Integrated Monitoring Partners

Advanced alarm management, live video verification, and two-way intervention.

Video verification workflows that help improve response efficiency.

Open platform monitoring integration for scalable security operations.

Detection Is Good. Intervention Is Better.

Digital Deterrent becomes even more powerful when combined with professional monitoring and verified response.

Digital Deterrent® in Action

Unauthorized activity can lead to vandalism, theft, and safety concerns.

"WARNING!"
"YOU ARE IN A MONITORED AREA. PLEASE LEAVE THE PREMISES IMMEDIATELY."

Advanced analytics detect subjects who linger within detection zones and deploy anti-loitering protocols.

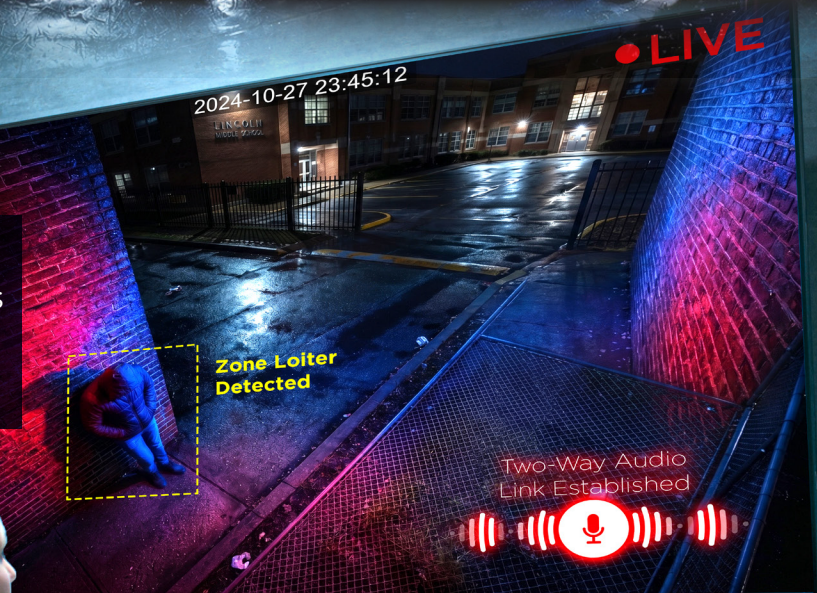

Alerts are sent to monitoring centers where security professionals can verify and escalate the situation if necessary.

2024-10-27 23:45:12

Zone Loiter Detected

Two-Way Audio Link Established

Remote monitors are empowered with two-way audio to address concerns directly.

Ideal For:

RECOMMENDED RECORDERS

N8NRX

Small System Supports Up To 8 Cameras

- Built-in PoE
- Advanced Search
- Multi-Camera Deployments

N16NRX

Medium System Supports Up To 16 Cameras

- Built-in PoE
- Advanced Search
- Multi-Camera Deployments

N32NRN

Medium System Supports Up To 32 Cameras

- Flexible Storage Options
- Advanced Search
- Multi-Camera Deployments

N64NR

Large System Supports Up To 64 Cameras

- Flexible Storage Options
- Advanced Search
- Multi-Camera Deployments

N128NR

Industrial System Supports Up To 128 Cameras

- Flexible Storage Options
- Advanced Search
- Multi-Camera Deployments

SecureGuard® Cloud

Powered by **speco technologies**

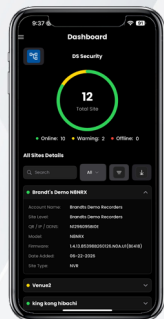

Turn Every Installation Into Recurring Revenue.

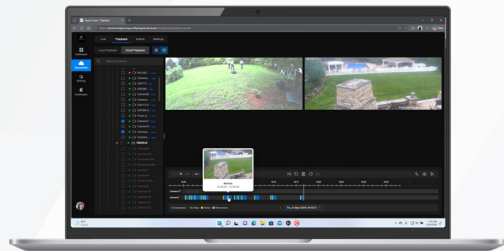

SecureGuard® Cloud is a powerful, easy-to-manage video management platform built for dealers and installers who want to create recurring monthly revenue, reduce service costs, and deliver a better customer experience.

Multi-camera viewing lets you keep track of multiple sites at once.

Device health management tools keep you informed of outages and areas of concern.

Review and download recorded footage from the cloud to your device with full event timelines.

All from your PC, tablet, or phone.

Learn more about the SecureGuard® Cloud App [HERE](#)

Build Your Recurring Monthly Revenue

WHERE RECURRING REVENUE COMES IN

This is also where cloud starts to make more sense from a business standpoint. When you're managing systems remotely, providing access, and supporting multiple locations through a centralized platform, you're delivering an ongoing service—not just installing hardware.

THAT OPENS THE DOOR TO:

Cloud access plans

System management services

Remote support agreements
